

Club Website Project

Description: Ask a sponsor what they would like on their club's web page (gather the content)—take notes. They will be considered your “client”, you will check back with them later for feedback. Create a **flowchart** to help you organize the structure your website. Then develop a **detailed storyboard** for all your pages. You should create at least 4 web pages. The first will be the club home (index.htm) page. Be creative and meet the requirements.

Complete Planning and Design sheet:

1. Define your goals and Gather content (from your client...the club sponsor and officers are your clients)
2. Organize structure of your content (flowchart)
3. Plan layout and interactivity (storyboard)
 - Include on storyboard:
 - a. What are some possible web sites that I might use as models?
 - b. What kinds of links (outside of my web) do I want to have?

Production Process:

Include in Website:

- Sufficient amount of relevant information for club
- Tables **MUST** be used for layout
- Hyperlinks (including 2+ links outside of your site)
- Scanned pictures or digital camera pictures
- Form for club membership
- DHTML (use wisely)
- Remember to follow page design and layout criteria.... (From discussions, handouts, and notes...review scoring guide)

- ☛ Have two people (sample audience) evaluate your website. Make them be critical! List 2 positive comments and 2 constructive comments they had for you? (Make these changes if necessary)

Publish Site:

- Choose a free web hosting service to publish your site.

Turn in:

- Printed version of the index page from web browser (published page)
- Design documents (Planning and design sheet, Flowchart, Storyboard)
- Client sheet (will be separate grade)
- Copy project folder to designated network drive
